EDUCATION

San José State University

SPRING 2027 — PLANNED

B.S. Computer Science (transfer) · San José, California

Transferring from Los Medanos College.

Los Medanos College

JANUARY 2025 — DECEMBER 2026 (EXPECTED)

A.S. Computer Science · Pittsburg, California

Graduated with honors — 4.0 GPA.

Khwaja Abdullah Ansari High School

MARCH 2008 — DECEMBER 2010

High School Diploma, General Studies · Afghanistan

EXPERIENCE

WiloSync

JUNE 2026 — PRESENT

Co-founder · California

Automation platform for service businesses: lead capture and AI screening, appointment and payment reminders, review requests.

Define the product, direct the build and ship it — the platform is TypeScript and Next.js, built with AI assistance — including integrations across twenty-odd third-party APIs.

Gawfco Enterprises, Inc.

APRIL 2023 – DECEMBER 2024

Accountant · Lafayette, California

Owned day-to-day accounting and month-end close: AP/AR, reconciliations, journal entries, accruals and GAAP reporting.

Maintained the general ledger and chart of accounts to audit-ready standard; filed sales/use tax, 571-L and 1099s.

Documented SOPs and streamlined workflows – the work that later became the gas station reporting system.

LanguageLine Solutions

FEBRUARY 2022 – APRIL 2023

Pashto Interpreter · United States

Real-time Pashto–English interpretation for healthcare, government, legal and financial clients, under HIPAA.

Consecutive interpretation across medical visits, 911 and public safety, social services and banking.

Robert Half

NOVEMBER 2022 – FEBRUARY 2023

Accounts Payable Clerk · Lafayette, California

Full-cycle AP: high-volume invoice entry, coding to cost centres, check runs and discrepancy resolution.

Mission Essential

JULY 2019 – APRIL 2021

Linguist · Bagram District, Parwan, Afghanistan

National Statistics and Information Authority (NSIA)

DECEMBER 2020 – AUGUST 2021

NID Verification Officer · Kabul, Afghanistan

Ariana Medical Complex

OCTOBER 2021 – APRIL 2022

Patient Billing & Customer Service · Kabul, Afghanistan

Albashir Group

OCTOBER 2017 – JUNE 2019

Accounts Supervisor · Kabul, Afghanistan

Royal Pure Gold (Albashir Group)

JULY 2016 – OCTOBER 2017

Customer Service Supervisor · Kandahar, Afghanistan

Etisalat Afghanistan

OCTOBER 2015 – JULY 2016

Call Centre Representative · Kabul, Afghanistan

RSDOA

FEBRUARY 2014 – OCTOBER 2015

Admin & Finance Assistant · Kabul, Afghanistan

TECHNICAL

I WRITE Java · Python · SQL

STUDYING
NOW C++

I WORK IN TypeScript · React · Next.js · Node.js · Prisma — *Read, modify and debug; AI-assisted for the heavy lifting.*

I OPERATE Git · GitHub · GitHub Actions · Vercel · Supabase · PostgreSQL · Docker

A word on how these were built. The products here are written in TypeScript and React, with AI assistance. I can read that code, change it, and trace a bug through it, and I run everything around it myself — version control, deployments on Vercel, Postgres on Supabase, migrations, environment config, CI. What I would not claim is that I write React fluently from a blank file. The languages I write myself are Java, Python and SQL, with C++ this term.

I am telling you this because the alternative is a skills list that falls apart in the first interview, and because the part I did bring is the part that is hard to hire for. I spent two years closing books, so I knew what a daily close report has to prove before anyone could explain it to me. I specified these systems, made the calls I can defend — deterministic parsing instead of a model, where the validation tolerances sit, how the role hierarchy keeps one company's numbers away from another's — and I tested, corrected and shipped them.
